

5804BD/5804

The power and convenience of wireless technology has found a home in residential security. The 5804, one of our most popular wireless remotes, gives your customers personal control of their security systems, in addition to the convenience of controlling lights and appliances. With its sleek, compact design, the 5804 is easily carried or stored anywhere.

The 5804BD offers more than remote control capability. With the touch of a single button, the 5804BD can arm, disarm or confirm system status by lights and tones feedback. These lights and tones resemble those of ADEMCO keypads, so training is minimized. Easy-to-use, the 5804BD and 5804 require no codes to remember.

5804BD

5804

Wireless Key

Similar in size to a remote car alarm key, the 5804 Wireless Key offers many of the features of a traditional keypad with convenient fingertip control:

- ◆ Four completely programmable buttons
- ◆ User replaceable, long-life lithium batteries
- ◆ Recessed keys
- ◆ Remote operation of lights and appliances
- ◆ One-button operation (no codes to remember)

Dimensions:

- ◆ Transmitter: 2.25" H x 1.5" W x 0.5" D

In, around or away from home, system control has never been easier than it is today.
