

6128

The 6128 offers great looks, ease of use, and brings protection to your home and possessions. The compact, economical 6128 keypad provides a fixed English display plus many standard features found only in more expensive keypads.

An easy-to-use information center

This designer styled keypad provides a status report of your security system at-a-glance. Information is displayed in fixed words through a liquid crystal display (LCD) - there are no confusing symbols or blinking lights. The keypad is designed in the form of a telephone touchpad for ease of operation and flexible control.

Customized to meet your needs and preferences

Your system is programmed to your specific needs. Depending on your system, different emergency situations can be programmed so that a signal will be sent to a 24-hour central station in case of a fire, police or personal emergency, simply by depressing the appropriate keys.

Keypad features:

- ◆ New attractively designed white keypad with removable door
- ◆ New easy-touch, white rubber keys are backlit.
- ◆ Zone location label can be filled out to identify protected areas quickly
- ◆ Built-in Piezo sounder - makes audible "beeps" for entry/exit delays, system status and other alarm conditions
- ◆ Compact size can be used anywhere unobtrusively - blends in with any decor
- ◆ User friendly - all system functions are clearly marked on the touch pad. Operation is simplified by using a uniform "security code + command" entry to perform any desired function.

New designer styled keypad has backlit keys, a fixed English display and removable door.
