

No. 3040 ANTI-TAMPER LOCK GUARD

NOTE: This GUARD may be installed without the use of special tools.

- 1) Place existing lock into GUARD (see illustration).
- 2) Place one washer over threaded part of lock.
- 3) Insert TRUARC ring into groove provided in GUARD.

NOTE: Lightly lubricate or grease TRUARC ring.

- 4) Slide second washer over threaded part of lock.*

The assembly is now ready for normal installation.

*In the event that lock and GUARD assembly will be mounted on an uneven surface, a third spacer washer has been provided to prevent interference between GUARD and lock plate. If necessary, insert washer behind second washer in step 4.

Future disassembly of GUARD, if required, may be accomplished with TRUARC pliers or equivalent.
