

Publicly traded on NASDAQ Symbol: NSSC

PROGRAMMING INSTRUCTIONS

GEM-P1664 CONTROL PANEL/COMMUNICATOR

Programming the GEM-P1664 Control Panel with the "Classic" GEM-RP1CAe2 Keypad and the "K Series" GEM-K1CA Keypad

"Classic" GEM-RP1CAe2

"K Series" GEM-K1CA

Quick Start (for "Classic" GEM-RP1CAe2)

1. Refer to the wiring diagram, connect Siren, Aux. Power, PGM Output, Remote Bus, Earth ground, Zone and Telephone wiring. NOTE: See Installation Instructions (WI1424).
2. Connect AC power first and then the battery.
3. Configure the keypad (see page 42).
4. Access the Easy Menu Driven (Dealer Program) Mode:

Press NO (**INSTANT**) until "ACTIVATE PROGRAM Y/N" appears on the keypad display.

Press YES (**INTERIOR**) to Enter Dealer Program Mode. Go to page 5.

Quick Start (for "K-Series" GEM-K1CA)

1. Refer to the wiring diagram, connect Siren, Aux. Power, PGM Output, Remote Bus, Earth ground, Zone and Telephone wiring. NOTE: See Installation Instructions (WI1424).
2. Connect AC power first and then the battery.
3. Configure the keypad (see page 42).
4. Access the Easy Menu Driven (Dealer Program) Mode:

Press NO (**AWAY**) until "ACTIVATE PROGRAM Y/N" appears on the keypad display.

Press YES (**STAY**) to Enter Dealer Program Mode. Go to page 5.

**THIS MANUAL INCLUDES FEATURES WHICH ARE ONLY AVAILABLE IN
CONTROL PANEL FIRMWARE VERSION 30B OR LATER.**

CHANGES FROM PREVIOUS EDITION

The following changes have been made to this manual (WI1422B) since the previous edition (WI1422A):

- Added new feature to address 2054 bit 2 (option 3) "TCP/IP Panel/Site Initiated Functions" on page 19.
- Added new feature to addresses 0461, 0483 and 0505 bit 6 (option 7) "Enable TCP/IP AES RPT" on page 20.

IMPORTANT NOTE

This manual supports the keypad programming of the GEM-P1664 control panel with the NAPCO "classic" GEM-RP1CAe2 keypad as well as the GEM-K1CA "K Series" keypad. The new "K Series" GEM-K1CA model offers the new STAY and AWAY buttons with simplified functionality, along with the new MENU and ENTER buttons.

While the instructions in this manual are depicted using the GEM-K1CA keypad, the manual applies to both the "classic" and the "K Series" keypads.

Program Mode is the same for both keypads--**only the button names have changed**, as follows:

- The  button and the  button operate identically (in Program Mode) for both keypads.
- The  button and the  button operate identically (in Program Mode) for both keypads.
- The  button and the  button operate identically (in Program Mode) for both keypads. The words "NEXT/YES button" are used in this manual.
- The  button and the  button operate identically (in Program Mode) for both keypads. The words "PRIOR/NO button" are used in this manual.

 **For consistency, it is recommended that all keypads either be all "classic" or all "K Series"--both keypad types should not be used in one alarm system.**

Refer to accompanying GEM-P1664 Installation Instructions (WI1424) for installation information.

SYSTEM PROGRAMMING OPTIONS

INTRODUCTION

The GEM-P1664 control panel may be programmed by various means, each of which will be covered in detail in the sections that follow. Keypad displays shown are for a GEM-RP1CAe2/K1CA (version 8 keypad), the recommended keypad for programming. For Programming Instructions with the GEM-RP2ASe2/GEM-K2AS, GEM-RP3DGTL/GEM-K3DGTL and the GEM-RP4RFC/GEM-K4RF series, see WI1423.

✓ **Downloading From a Computer.** This is the preferred method of programming. The panel may be downloaded from (or uploaded to) an IBM PC-compatible computer, either locally or remotely. Napco's PCD-Windows Quickloader software features context-sensitive help screens as well as an error-checking utility that prevents programming of incompatible or conflicting data to ensure proper panel operation. **Note:** Unattended downloading from a computer is not allowed for Fire Alarm or UL installations.

✓ **Easy Menu-Driven Program (Dealer Program) Mode - Keypad Programming.** The Easy Menu-Driven Program Mode allows keypad programming of number of zones in area 1, panel zone doubling, number of fire zones (both 4-wire and 2-wire), local or Central Station reporting, number of exit/entry zones, number of interior zones, number of 24 hour zones, number of chime zones, Chime 2 zones, Exit/Entry2 zones, 50ms loop response zones (**Note:** 750mS is required for Loop Response time in UL installations), aux output activated on alarm zones, sensor watch zones, keypad sounder on alarm zones, auto bypass re-entry zones, EOLR zones, number of keypads in area 1, Central Station telephone number, Central Station account number, Central Station receiver format, User Codes, RF transmitter points, RF keyfob transmitters, zone descriptions, date/time, dealer code, Test Timer, Telco line fault test, Burg output chirp on keyfob, keypad time/date display, enable CP-01 programming, and clear dealer program/cold start. For new panels, a custom default program may be created at the keypad. A menu-driven utility prompts the installer to configure the system. Further detailed customization is accomplished in the Direct Address Program Mode.

✓ **Direct Address (Dealer Program) Program Mode - Keypad Programming.** The Direct Address Program Mode is an extension of the Dealer Program Mode wherein data is entered at the keypad by location. This mode is accessed from the Easy Menu Driven Program Mode by pressing the  button at any time.

✓ **User Program Mode - Keypad Programming.** The User Program Mode is intended for authorized users and is limited to keypad programming of User Codes, Time, Date and Zone Descriptions.

DOWNLOADING FROM A COMPUTER

The control-panel program may be downloaded from the computer by any of the following methods.

Local Downloading

(**Note:** This procedure should be used after installation, after peripheral devices are connected).

For direct high-speed data transfer to the control panel from a desktop computer, connect the download jack (JP2) on the panel to the LOCAL jack (J3) on the Napco PCI2000/3000 computer interface using the supplied 6-conductor cable. (Refer to PCI2000/3000 Installation Instructions WI443 for wiring diagram and procedures).

Similarly, a high-speed local download may be made in the field using a notebook or laptop computer. Connect JP2 on the control panel to a Napco PCI-MINI computer interface using the 6-conductor cable supplied. (Refer to PCI-MINI Installation Instructions WI767).

Remote Downloading

(Also see PCI2000/3000 Installation Instructions WI443). **Note:** Unattended downloading from a computer is not allowed for Fire Alarm or UL installations.

Function Mode

Start by establishing a telco connection between the computer operator and the installer. During this procedure, voice contact will be lost, therefore both the installer and the computer operator should be familiar with the operation. When a steady high-pitched tone is heard at the site phone, access the "ACTIVATE DOWNLOAD" Function (see Keypad Programming Modes), then press the  or  button or the **NEXT/YES** button; the site phone will go dead.

Hang up the phone and wait for a call from the central station confirming a successful download.

Callback Method

An installed, unattended panel may be programmed or reprogrammed remotely using the Callback-Method Download feature of the PCD-Windows software. Remote downloading requires a modem compatible with the PCI2000/3000. Upon answering the call from the computer, the panel will verify the Download Security Code and, if confirmed, will establish a connection. If a Callback Number is programmed into the panel, the panel will automatically disconnect and call the computer at this number before establishing a connection.

EASY MENU DRIVEN PROGRAM MODE

DEALER PROGRAM - PRELIMINARY INFORMATION

-  The Default Dealer Code is . Use this code to enter the Dealer Program Mode to program a custom Dealer Code, which replaces the Default Dealer Code. If you clear your Dealer Code, use the Default Dealer Code once again to enter programming.
-  After entering codes or data, press the save  button. Data will not be stored into memory unless  is pressed.
-  If the keypad is in the Program Mode and no activity is detected for longer than 4 minutes, a steady tone will sound.
-  Silence the sounder by the button to continue, or by pressing the button to exit.
-  When programming a Multiple Area System, Direct Address Programming Mode must be used to complete the program.

For ease of programming, it is recommended that a GEM-RP1CAe2 or GEM-K1CA be used. If a GEM-RP2ASe2/ GEM-K2AS is used, see WI1423.

ACCESSING DEALER PROGRAM MODE

1. Press
Dealer Code (Default =)

2. Press PRIOR/NO button until "ACTIVATE PROGRAM Y/N" appears on LCD screen.

3. Press NEXT/YES button to Enter Dealer Program Mode.

4. Press **to Exit Dealer Program Mode when finished.**

CUSTOMIZING A DEFAULT PROGRAM

For new panels, you can design a default program that will best suit your application. Using this procedure, you will configure the panel for:

- Number of Zones in Area 1
- Panel Zone Doubling
- Fire Zones in Area 1
- 2-Wire Fire Zones in Area 1
- Local or Central Station Reporting System
- Exit/Entry Zones in Area 1
- Interior Zones in Area 1
- 24 Hour Zones in Area 1
- Chime Zones in Area 1
- Chime 2 Zones in Area 1
- Exit/Entry2 Zones in Area 1
- 50mS Loop Response Zones (Note: 750mS is required for Loop Response time in UL installations).
- Aux Output Activated on Alarm Zones
- Sensor Watch Zones
- Keypad Sounder on Alarm Zones
- Auto Bypass re-entry Zones
- Enable no EOLR Zones
- Enable Telco Line Fault Test
- Enable Burg Output Chirp on Keyfob
- Enable CP-01 Programming
- Number of Keypads in Area 1
- Central Station Receiver 1 Tel. Number
- Central Station Receiver 1 Account Number
- Central Station Receiver 1 Format
- Enter User Codes
- RF Transmitter Points
 - Quick "Enroll" Method
- Key Fob Transmitters
- Enter Zone Descriptions
- Enter Date
- Enter Time
- Dealer Code
- Test Timer

This procedure will automatically set up system keypads, EZMs, wireless transmitters, etc. After your basic default program has been loaded, you may alter it as necessary in the Direct Address Program Mode.

NEW PANELS: The custom default program may be created for new panels only. Once the panel has been programmed by any means, the number zones will be suppressed and cannot be changed. Should it be necessary to create a new custom default program, (a) from the Dealer Program Mode, press the button to enter the Direct Address Program Mode; (b) access Location 2285 (Clear Program); (c) press the  button and start over.

GEM-RP1CAe2/GEM-K1CA Keypad Easy Program Menu

To create a custom program using the GEM-RP1CAe2/GEM-K1CA keypad, simply answer the following questions and record your information on the *Easy Menu Programming Worksheet*. In each of the following steps, press **[MENU]** to set cursor, the NEXT/YES button to go forwards, the PRIOR/NO button to go backwards, **[SAVE]** to save and **[RESET]** twice to exit at any time.

```
#of Zns in Area1
Enter # Zones XX
```

(Direct Entry)

Total Number of Zones in Area 1 (New Program Only)

- Enter the total number of zones to be programmed for Area 1.
- Valid entries are from 01 to 64. Directly enter the total number of zones, including leading zeros.
- The system is based on groups of 4 zones each (after the first 8 zones), and will automatically round up to the next group of 4. For example, if you enter 18, it will automatically convert this to 20 zones. Press **[SAVE]** to save. Press the NEXT/YES button to proceed.

```
EZ Zone Doubling
Enabled? Y/N
```

(Press YES or NO)

Panel Zone Doubling (New Program Only)

- To double the number of hardwired panel zones from 8 to 16, press YES.
- If Panel Zone doubling is not desired, press the PRIOR/NO button.
- The 16 zones will remain EOL terminated zones, requiring Normally Closed devices only.
- Refer to Wiring Diagram and Installation Instructions for wiring instructions

```
Fire Zones
Enter Zone # **
```

(Direct Entry)

Fire Zones in Area 1 (New Program Only)

- Enter the zone number of any Fire Zones (including 2-wire, 4-wire or wireless).
- Valid entries are from 01 to 64.
- Directly enter each zone number, including leading zeros, and press **[SAVE]** to save, and then repeat for any additional zone(s). Press the NEXT/YES button to proceed.

```
2-Wire Fire Zns
Enter Zone # **
```

(Direct Entry)

2-Wire Fire Zones in Area 1 (New Program Only)

- Enter the zone number of any Fire Zone (from previous question) to be used with 2-wire smoke detectors.
- Valid entries are 07 and 08. Directly enter each zone number, including leading zeros.
- Press **[SAVE]** to save, and repeat for any additional zone(s); press NEXT/YES to proceed.

NOTE: Only zones which have been designated as Fire Zones can be programmed as 2 Wire Fire zones. JP3 must be set to "2-WF" position for 2-wire fire. (refer to Installation Instructions).

```
Report All Zones
To Central? Y/N
```

(Press YES or NO)

Local or Central Station Reporting System (New Program Only)

Press the NEXT/YES button for all zones to report; press the PRIOR/NO button for local system

```
Exit/Entry Zones
Enter Zone # XX
```

(Direct Entry)

Exit/Entry Zones in Area 1 (New Program Only)

- Enter the zone numbers of zones to be used as Exit/Entry zones.
- Valid entries are from 01 to 64. Directly enter each zone number, including leading zeros.
- Press **[SAVE]** to save and repeat for any additional zone(s); press the NEXT/YES button to proceed.

NOTE: Exit/Entry Entry time of 30 seconds will automatically be programmed.

```
Interior Zones
Enter Zone # XX
```

(Direct Entry)

Interior Zones in Area 1 (New Program Only)

- Enter the zone numbers to be used as Interior Zones.
- Valid entries are from 01 to 64. Directly enter each zone number, including leading zeros.
- Press **[SAVE]** to save and then repeat for any additional zone(s).
- Press the NEXT/YES button to proceed.
- All Interior zones will also be automatically programmed as "Exit/Entry Follower" and as "Power Up Delay" zones.

```
24 Hour Zones
Enter Zone # **
```

(Direct Entry)

24 Hour Zones in Area 1 (New Program Only)

- Enter the zone numbers of zones to be used as 24 Hour zones.
- Valid entries are from 01 to 64. Directly enter each zone number, including leading zeros.
- Press **[SAVE]** to save and repeat for any additional zone(s); press the NEXT/YES button to proceed.

NOTE: 24 Hour Zones will automatically be programmed as audible (Burg Output).

```
Chime Zones
Enter Zone # **
```

(Direct Entry)

Chime Zones in Area 1 (New Program Only)

- Enter the zone numbers which are to be used as Chime Zones.
- Valid entries are from 01 to 64. Directly enter each zone number, including leading zeros.
- Press  to save, then repeat for any additional zone(s), press the NEXT/YES button to proceed.

NOTE: A chime time of 2 seconds will be automatically programmed.

```
Chime 2 Zones
Enter Zone # **
```

(Direct Entry)

Chime 2 Zones in Area 1 (New Program Only)

- Enter the zone numbers which are to be used as Chime 2 Zones.
- Valid entries are from 01 to 64. Directly enter each zone number, including leading zeros.
- Press  to save, then repeat for any additional zone(s), Press the NEXT/YES button to proceed.

NOTE: A chime time of 2 seconds will be automatically programmed.

Chime 2 zones give a distinct pulsating tone when zone is faulted.

```
Exit/Entry2 Zones
Enter Zone # **
```

(Direct Entry)

Exit/Entry2 Zones in Area 1 (New Program Only)

- Enter the zone numbers of zones to be used as Exit/Entry zones.
- Valid entries are from 01 to 64. Directly enter each zone number, including leading zeros.
- Press  to save and repeat for any additional zone(s); press the NEXT/YES button to proceed.

NOTE: An Exit/Entry 2 Entry Time of 30 seconds will automatically be programmed.

```
50mS Loop Zones
Enter Zone # **
```

(Direct Entry)

50 mS Loop Response Zones (New Program Only) Note: 750mS is required for Loop Response time in UL installations.

- Enter the zone numbers of zones to be have a 50mS loop response.
- Valid entries are from 01 to 08. Directly enter each zone number, including leading zeros.
- Press  to save, then repeat for any additional zone(s), Press the NEXT/YES button to proceed.

Note: Only panel zones 01-08 can be programmed for Quick Loop Response. All other zones can be programmed via their respective EZM's (hardware). Time can also be adjusted via address 2280.

```
Aux Output Zones
Enter Zone # **
```

(Direct Entry)

Aux Output Activated on Alarm Zones (New Program Only)

- Enter the zone numbers of zones to activate the PGM2 upon alarm.
- Valid entries are from 01 to 64. Directly enter each zone number, including leading zeros.
- Press  to save, then repeat for any additional zone(s), Press the NEXT/YES button to proceed.

NOTE: A PGM2 Timeout of 15 minutes will automatically be programmed.

```
Sensor Watch Zns
Enter Zone # **
```

(Direct Entry)

Sensor Watch Zones (New Program Only)

- Enter the zone numbers of zones to be Sensor Watch zones.
- Valid entries are from 01 to 64. Directly enter each zone number, including leading zeros.
- Press  to save, then repeat for any additional zone(s), Press the NEXT/YES button to proceed.

NOTE: A Sensor Watch Time of 24 hours will automatically be programmed.

```
KP Sndr Alrm Zns
Enter Zone # **
```

(Direct Entry)

Keypad Sounder On Alarm Zones (New Program Only)

- Enter the zone numbers of all zones to activate the Keypad Sounder upon alarm.
- Valid entries are from 01 to 64. Directly enter each zone number, including leading zeros.
- Press  to save, then repeat for any additional zone(s), Press the NEXT/YES button to proceed.

```
Auto Byp REnt Zn
Enter Zone # **
```

(Direct Entry)

Auto Bypass Re-entry Zones (New Program Only) (Not Evaluated by UL)

- Enter the zone numbers of zones to be Auto Bypass Re-entry zones.
- Valid entries are from 01 to 64. Directly enter each zone number, including leading zeros.
- Press  to save, then repeat for any additional zone(s), Press the NEXT/YES button to proceed.
- Auto Bypass Re-entry Zones allow the system to be armed with the zone faulted but come back into the system (armed) when the zone is subsequently closed.

```
Enable No EOLR
Zones Y/N
```

(Press YES or NO)

Enable No EOLR Zones (New Program Only)

- Press YES to program all zones except 24 Hr & fire zones for No End Of Line Resistor. Press NO to continue. Do NOT program this feature for UL installations.

```
Enable Telco
Line Test? Y/N
```

(Press YES or NO)

Enable Telco Line Fault Test?

- Press YES to enable Telco Line Fault Test.
- Press NO to continue. **NOTE: If enabled, a Telco Line Fault Test Delay of 60 sec. will automatically be programmed.**

Enable Burg Out Chirp? Y/N

(Press YES or NO)

Enable SIA CP-01? Y/N

(Press YES or NO)

Area 1 Keypads Enter # KPs 01

(Direct Entry)

(Direct Entry)

Central Station Account # (____)

(Direct Entry)

See WI for Info Rcvr Format (0)

(Direct Entry)

Enter user code-> U01 123 - 9-

User# User Code Area 1 Area 2

Enable Burg Output Chirp on KeyFob?

- Press the NEXT/YES button to enable Burg Output Chirp on KeyFob Arm / Disarm.
- Press the PRIOR/NO button to continue.

NOTE: The Burg Output will chirp once on Keyfob Arm and twice on Keyfob Disarm.

Enable SIA CP-01 Features?

- Press the NEXT/YES button to enable.
- Press the PRIOR/NO button to continue.

The SIA CP-01 Features are designed to reduce the incidence of false alarms. **NOTE:** Do not enable unless reporting, otherwise system trouble *Fail to Communicate* may occur.

Number of Keypads in Area 1

- Enter the total number of Keypads to be installed in Area 1.
- Valid entries are from 01 to 07. Directly enter the number of keypads, including leading zeros. Press to save. Press the NEXT/YES button to proceed.

NOTE: Area 2-4 keypads must be assigned in Direct Address Programming. See Keypad Options.

Central Station Receiver 1 Telephone Number

- Enter telephone number of up to 16 digits.
- Press through for digits 1-9; for a zero and for a blank (*).
- Press through for letters B-F, respectively.
- Pre-Dial Delay = "D" (); Dial-Tone Detection = "E" ().
- Press to save and press the NEXT/YES button to proceed.

NOTE: Central Station Receiver 2 and 3 Telephone Numbers must be entered in Direct Address Programming. See CS Receiver Options.

Central Station Receiver 1 Account Number

- Enter an account number of up to four digits.
- Press through for digits 0-9, and for a blank (*).
- Press to save and press the NEXT/YES button to proceed.

NOTE: Central Station Receiver 2 and 3 Account Numbers must be entered in Direct Address Programming. See CS Reporting Options.

Central Station Receiver 1 Format

- From the table at the right enter the receiver format.
- Press through , and for blank (*).
- Press through for letters B-E.
- Press to save; press the NEXT/YES button to proceed.

| DATA ENTRY | CS RECEIVER 1 FORMAT |
|------------|---------------------------------|
| • (blank) | Ademco Slow, Silent Knight Slow |
| 2 | Radionics Fast |
| 3 | Silent Knight Fast |
| 4 | Radionics, DCI, Franklin Slow |
| 5 | Universal High Speed |

| C | Ademco Point ID |
| E | Pager |

Enter User Codes (Press to set cursor.)

For default program, enter up to 64 User Codes, with Area 1, 2, 3 & 4 Options.

- Press the () button once to set the cursor to the User Code.
- Press through to enter a code from 3 to 6 digits, leave blank (*) any trailing boxes.
- Press to set the cursor to the Area 1 Options Level. Refer to the table below for available options. For Area 2 Options, press the () button once again. For Area 3 & 4 Options, press () a third and fourth time.

- If "Enable Global Ambush Code" (Address 1422) is enabled and "Global Ambush Code" (Address 2045) is **not** left blank (*), *do not* program the first two digits of ANY User Code the same as the "Global Ambush Code". See Address 2045 further in this manual for more information.
- Press to save. **Note:** Duplicate User Codes are not allowed; therefore a duplicate Code entered in the LCD Window will erase when is pressed. To proceed to the next User Code, press () to set the cursor to the User Number and change it using the number buttons. Press the NEXT/YES button to proceed.

| USER OPTIONS | | | | |
|----------------------------|----------------|----------------|----------------|----------------|
| USER CODE (UP TO 6 DIGITS) | AREA 1 OPTIONS | AREA 2 OPTIONS | AREA 3 OPTIONS | AREA 4 OPTIONS |
| | | | | |

| USER AREA OPTIONS | | |
|-------------------|----------|----------------|
| DATA ENTRIES | | OPTION ENABLED |
| L | R | |
| blank(*) | blank(*) | Disabled |
| blank(*) | 1 | Arm/Disarm |
| blank(*) | 2 | Arm Only |
| blank(*) | 3 | Service |
| blank(*) | 4 | Access |
| blank(*) | 5 | Ambush |
| blank(*) | Add 8 | * User Program |
| 4 | blank(*) | Bypass Enable |

Example: Program a code of "2222" for user 02, with area 1 options of "Arm/Disarm" and "User Program". Enter "2222" for a user code, "*" (blank) "9" for area 1 options and "*" (blank) "*" (blank)" for area 2 options.

| AREA OPTIONS | EXPLANATION |
|----------------|---|
| Disabled | User Code not active in this area. |
| Arm/Disarm | Allows User Code to arm/disarm this area. |
| Arm Only | Prevents User Code from disarming this area. |
| Service | A Service Code has restricted arm/disarm rights; if an area is armed with a Service Code, a "MIGRATOR ON" appears on the GEM-RP2ASe2 keypad and the area can be disarmed with any valid User Code, including a Service Code. If the area is armed with OTHER than a Service Code, it CANNOT be disarmed with a Service Code. This is typically used to allow tradesmen access to premises under control of the owner. |
| Ambush | There are two types of Ambush Codes: (1) A 2-digit code (prefix) that is entered immediately prior to (and as part of) the regular User Code and (2) A separate and unique User Code. Disarming with an Ambush Code will cause a silent report to be sent to a central station. Thus, should a user be forced to disarm, he can silently signal an emergency while appearing to be merely disarming the system. |
| Access | This is normally used to activate a door strike while an area is disarmed. Also program "Access Control on PGM2. Output" (Address 0719) and "PGM2 Output Access Control Timeout" (Address 0711). |
| * User Program | User Program Option is enabled. To enable User Program Option for any user, add 8 to the data entry for Area Option (see example). Then, User Programming can be performed at any Keypad by a user code with user program enabled. |
| Bypass Enable | Security Bypass--Bypass is enabled only with a security code. |

Related User Options: "Enable Global Ambush Code" (Address 1422), "Global Ambush Code" (Address 2045) & "Enable Manager's Mode" (Address 1421).

CHANGING OR CANCELING A CODE: To change any code, merely program over the existing code as described above and press  to save. Similarly, to cancel a code, blank out each number of the code and press  to save.

Zone # Mapped to Xmitter ID Check Sum Point #

RF Transmitter Points (Press  to set cursor.)

For each transmitter enter: (For wireless systems only. Also see Quick Method, which follows)

- The **zone number** (01–64) to which the transmitter will be mapped.
- The **6-digit RF ID #** and **1-digit checksum number** printed on the transmitter and box,
- The **point number** (1–2); enter "9" for *unsupervised* (all points).
- Press  to save and NEXT/YES button to proceed when all transmitters have been entered.

NOTE: When programming the ID Code number, "0" through "9" =  through  ; A =   ; B =   ; C =   ; D =   ; E =   and "F" =  .

Quick "Enroll" Method: If a receiver is already installed in the panel, transmitter wireless points can be programmed automatically ("enrolled") using the following procedure. **NOTE:** The transmitter point will be enrolled only if the signal strength is 3 or greater.

| ZN# | XMIT# | CS | P |
|-------|--------|----|-----|
| Zn01- | 000000 | : | 0-0 |

1. Enter the zone number to which the transmitter point will be mapped.
2. Press  to enter the Enroll Mode. The red and green LEDs on the keypad will flash and the window will display as shown at left.
3. Open the loop of the point that is to be programmed (GEM-TRANS2 only).
4. Install the transmitter battery. The keypad will beep to indicate that the point has been successfully enrolled. Multi-point transmitters can be mapped to successive zones simultaneously.

| ZN# | XMIT# | CS | P |
|-------|---------|-----|---|
| ZN01- | ENROLL: | A-- | |

Example. A 2-point transmitter has the RF ID number 287613:1. Map point 1 to Zone 6 and point 2 to Zone 9.

1. Enter the Enroll mode as described above.
2. Enter Zone "06".
3. Open point-1 loop.
4. Install the battery. The keypad will beep once to indicate that one point has been programmed. (Transmitter 287613:1, point 1 will be mapped to Zone 6).
5. Enter Zone "09".
6. Close point-1 loop and open point-2 loop.
7. Remove the transmitter battery, then re-install it. The keypad will beep once to indicate that one point has been programmed. (Transmitter 287613:1, point 2 is mapped to Zone 9).

KEY FOB ZONE ASSIGNMENT: Key fobs can also be assigned to zones to allow multiple wireless panic buttons on one alarm system, each reporting to a central station, a pager or having a description on the keypad that describes the person holding the key fob, the location where the person holding the key fob is stationed, or the special purpose of the key fob button being depressed. See the next page on Key Fob Transmitters as Zone Input Devices .

| KF | A | XMIT# | CS | OP |
|-----|---|--------|----|------|
| 01- | 0 | 000000 | : | 0 00 |

KF # Area Xmitter ID Check Sum Aux 1&2

Key Fob Transmitters as Arm/Disarm & Control Devices (Press  to set cursor.)

Key fobs can be programmed as "Arm/Disarm" devices using their On/Off buttons (refer to WI752). For each Key Fob Transmitter, enter:

- The **Key Fob Transmitter number** (01–8).
- The **area number** to which transmitter is assigned (0 to disable keyfob, 1 through 4).
- The **6-digit RF ID #** and **1-digit checksum number** printed on the transmitter and box,
- The **Aux 1 Option** (see key fob aux 1 & aux 2 options).
- The **Aux 2 Option** (see key fob aux 1 & aux 2 options).
- Press  to save and NEXT/YES button to proceed when all key fobs have been entered.

NOTE: When programming the ID Code number, "0" through "9" =  through  ; A =   ; B =   ; C =   ; D =   ; E =   and "F" =  .

EASY MENU DRIVEN PROGRAM MODE

Key Fob Transmitters as Zone Input Devices

(Refer to display above: press the AWAY button to go backwards).

Each of the 4 key fob buttons can be assigned to a zone. For example, On button = point 1; Off button = point 2; A1 = point 3; A2 = point 4. Up to 64 key fobs (using 1 button) or 32 key fobs (using 2 buttons) or 16 key fobs (using all 4 buttons) or any combination up to a maximum of 64 controlled zones can be assigned, providing multiple wireless panic buttons on a system, each reporting to a Central Station or a pager and/or annunciating on a keypad the key fob zone number with a description. To assign a key fob to a zone: program the key fob as you would a transmitter, entering the key fob's ID code, check sum and point number at the appropriate zone. The "Quick Method" is not allowed. The zone may be hardwired to an electrical sensor as well as assigned to a key fob (either one will activate the zone alarm output).

NOTE: If assigning a key fob to a zone, the "ON/OFF" buttons on the key fob will no longer arm/disarm the system. The key fob is converted to a "panic only" device.

| DATA ENTRY | AUX 1/AUX 2 OPTIONS |
|------------|-----------------------|
| 0 | None |
| 1 | Relay Group 1 Toggle |
| 2 | Relay Group 2 Toggle |
| 9 | Keypad Panic |
| A | Keypad Aux. |
| B | Instant |
| C | PGM2 Output Toggle |
| D | Access on PGM2 Output |
| E | Arm STAY |
| F | Interior Button |

01-

(Direct Entry)

Enter Zone Descriptions

- For each zone, enter a description of up to two lines. Press to save each description.
- See page 41 for instructions for entering characters and numbers for the zone descriptions.
- To proceed to the next description, place the cursor under the Zone Number (e.g. "1") and

press the number that corresponds to the zone. Program new description as above. **NOTE:** Zone Descriptions can only be entered through the GEM-RP1CAe2 Keypad or by using the Napco Quickloader Software. See Easy Menu Programming Worksheet for available zone description characters.

Enter Date
(/ /)

(Direct Entry)

Enter Date (Press to set cursor).

- Enter the current date in the format MM/DD/YY. (MM = month, DD = day and YY = year.
- Press to save. Press the NEXT/YES button to proceed.

Enter Time
(:)

(Direct Entry)

Enter Time (Press to set cursor.)

- Enter the current time in format HH:MMA/P, where HH=hours (01-12); MM=minutes (00-59).
- Select AM or PM by pressing any number button.
- Press to save. Press the NEXT/YES button to proceed.

Dealer Code
456789

Dealer Code

- Directly enter the Dealer Code (default = 456789), using through buttons.
- Press to save. Re-enter the Dealer Code to verify the previous code. Press to save.
- Press the NEXT/YES button to proceed.

DEALER CODE
RE-ENTER

Test Timer

- Select day(s) by simply erasing the unwanted days. Move the cursor over the day and press any number key to erase/restore the day. For example, "Monday" and "Friday" will appear as: "•M•••F•"
- Enter Time (in 24 hour format) by moving cursor under the left H and pressing two digits to overwrite the existing default of 00. **Note:** Midnight is 00:00. Enter minutes by continuing to enter data or if just updating minutes move the cursor under the left M and enter the two digits to overwrite the existing default of 00. Use as right cursor one position.

TEST TIMER
SMTWTFS HH:MM

EXIT DEALER PROGRAM MODE: This completes the custom default program. Press to enter the Direct Address Program Mode for further programming or press once again to end all programming and resume normal keypad operation.

CLEAR PROGRAM: Should it be necessary to create a new custom default program, (a) from the Dealer Program Mode, press to enter the Address Program Mode; (b) access Location 2285 (Clear Program) or 2286 (Cold Start); (c) press and then (d) press to exit the Dealer Program Mode. A "SYSTEM TROUBLE/E09-00 SERVICE" will occur. Press to silence the keypad.

Clear Dealer Program (Erases Dealer Program)

Use this feature to erase the Panel Program, while maintaining Scheduled Data and Zone Descriptions. Access address 2285 and press . Data entry is not allowed. **NOTE:** Enter Easy Menu Driven Program Mode to reprogram system.

2285 XX H

Cold Start (Erases Entire Program)

This erases all programmed data (Dealer Program, Zone Description Data and Schedules). Access address 2286 and press . Data entry is not allowed. **NOTE:** Some features (schedules) can only be programmed again with the Downloading Software.

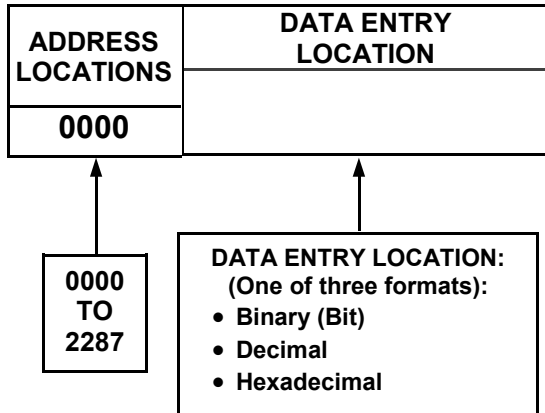

2286 XX H

EASY MENU DRIVEN PROGRAM MODE

DIRECT ADDRESS PROGRAM MODE

DIRECT ADDRESS OVERVIEW

Direct Address Programming allows you to go directly to the address locations (up to 2287) and change the data entries manually in order to customize your control panel options. Whereas the Easy Menu Program Mode guides you through limited selections to get you started, **Direct Address Program Mode** allows you to change all options directly. It consists of up to 2287 address locations each with data entry locations as shown in the following diagram (below left). The data entry location accepts data in one of three formats: Binary, Decimal and Hexadecimal (explained below in "Address Mode Displays"). The following diagram (below right) illustrates a *Decimal* format data entry location (using a GEM-RP1CAe2 keypad).

GEM-RP1CAe2 Keypad Display Example

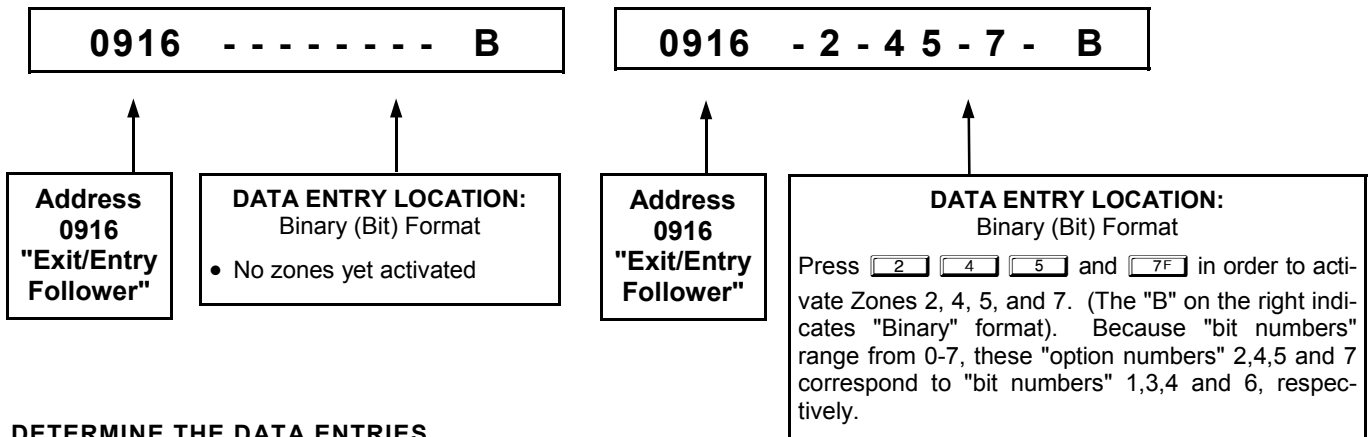

ADDRESS MODE DISPLAYS

There are three types of address displays when programming in Direct Entry Program Mode, as follows:

A) Binary (Bit) Format Example

Settings (such as Zone Features) display and accept data in "number" format. For example, Zone Features are turned on by the pressing of keypad buttons 1 through 8, with the activated Zone(s) displaying the corresponding decimal digit (replacing deactivated zones which are signified by dashes).

EXAMPLE: BIT Format with the GEM-RP1CAe2: Program Zones 2, 4, 5 and 7 as *Exit/Entry Follower Zones*.

DETERMINE THE DATA ENTRIES

- Referring to ZONE FEATURES in the Programming Worksheets that follow, the Exit/Entry Follower for Zones 1 through 8 are located at address 0916.

DIRECT ADDRESS PROGRAM MODE

| ZONE FEATURES | ADDR | ZONES 1 → 8 | | | | | | | | ADDR | ZONES 9 → 16 | | | | | | | |
|---------------------|------|-------------|----|----|----|----|----|----|----|------|--------------|-----|-----|-----|-----|-----|-----|-----|
| | | Z1 | Z2 | Z3 | Z4 | Z5 | Z6 | Z7 | Z8 | | Z9 | Z10 | Z11 | Z12 | Z13 | Z14 | Z15 | Z16 |
| | | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Exit/Entry Follower | 0916 | | | | | | 6 | 7 | 8 | 0911 | | | | | | | | |

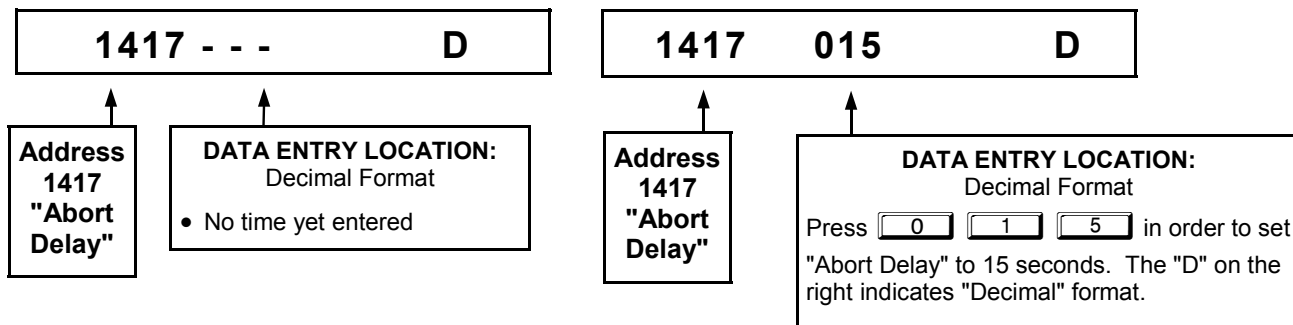

PROGRAM THE DATA ENTRIES

1. Enter the panel's Dealer Security Code, then press **[MENU]**.
2. Answer NO to all questions until "ACTIVATE PROGRAM Y/N" is displayed; then press YES. **NOTE:** If you pass "ACTIVATE PROGRAM", scroll backward using **[BYPASS]**.
3. Press **[RESET]** to enter the Address Program Mode. Address "0000" will display.
4. Press **[0]** **[9P]** **[1]** **[6]** to access Address 0916. *The existing data will display and the cursor will advance to the data field.*
5. Press **[6]** **[7F]** **[8A]**. The numbers 6,7 and 8 will appear on the keypad display indicating the zones activated.
6. Press **[ENTER]** to save. Address 0916 is now programmed with "6,7,8".
7. Press **[MENU]** and enter another 4-digit address to continue programming --or-- press **[RESET]** to exit and resume normal keypad operation.

B) Decimal Format Example

Settings (such as Entry and Exit Delay) display and accept data in decimal format, as a 3 digit number. Data is entered directly, by pressing keys 0 – 9, with the cursor automatically moving to the right upon each key press.

EXAMPLE: DECIMAL Format with the GEM-RP1CAe2: Program *Abort Delay* to be 15 seconds.

DETERMINE THE DATA ENTRIES

1. Referring to SYSTEM DELAYS & TIMEOUTS in the Programming Worksheets that follow, the Abort Delay is located at address 1417:

| ABORT DELAY (sec.) | ADDRESS 1417 | | |
|--------------------|--------------|--|--|
| | | | |

[Default = 0 sec. = blank (*)]

PROGRAM THE DATA ENTRIES

1. Enter the panel's Dealer Security Code, then press **[MENU]**.
2. Answer NO to all questions until "ACTIVATE PROGRAM Y/N" is displayed; then press YES. **NOTE:** If you pass "ACTIVATE PROGRAM", scroll backward using **[BYPASS]**.
3. Press **[RESET]** to enter the Address Program Mode. Address "0000" will display.
4. Press **[1]** **[4]** **[1]** **[7F]** to access Address 1417. *The existing data will display and the cursor will*

advance to the data field.

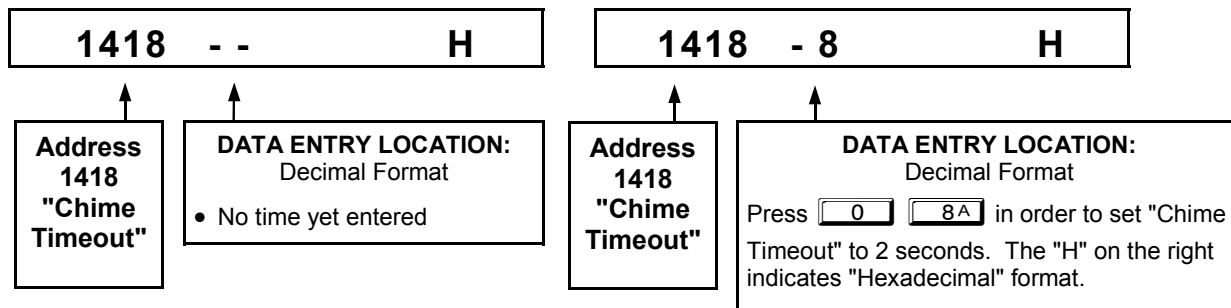

5. Press . The numbers 015 will appear on the keypad display indicating the number of seconds entered.
6. Press to save. Address 1417 is now programmed with a 15-second Abort Delay.
7. Press and enter another 4-digit address to continue programming--or--press to exit and resume normal keypad operation.

C) Hexadecimal Format Example

Data such as Report Codes displays and accepts data by means of a Hexadecimal display. Data is entered directly, by pressing keys 1 – 9, for zero, and through for hex B through F (11-15), with the cursor automatically moving to the right upon key press. See table below.

| HEXADECIMAL ENTRIES | | | | | |
|---------------------|---|-----------------|-------------|---|-----------------|
| ENTRY TOTAL | PRESS | KEYPAD DISPLAYS | ENTRY TOTAL | PRESS | KEYPAD DISPLAYS |
| blank | <input type="button" value="0"/> | • | 8 | <input type="button" value="8"/> <input type="button" value="A"/> | 8 |
| 1 | <input type="button" value="1"/> | 1 | 9 | <input type="button" value="9"/> <input type="button" value="P"/> | 9 |
| 2 | <input type="button" value="2"/> | 2 | 10 | <input type="button" value="*"/> <input type="button" value="0"/> | 0 |
| 3 | <input type="button" value="3"/> | 3 | 11 | <input type="button" value="*"/> <input type="button" value="1"/> | B |
| 4 | <input type="button" value="4"/> | 4 | 12 | <input type="button" value="*"/> <input type="button" value="2"/> | C |
| 5 | <input type="button" value="5"/> | 5 | 13 | <input type="button" value="*"/> <input type="button" value="3"/> | D |
| 6 | <input type="button" value="6"/> | 6 | 14 | <input type="button" value="*"/> <input type="button" value="4"/> | E |
| 7 | <input type="button" value="7"/> <input type="button" value="F"/> | 7 | 15 | <input type="button" value="*"/> <input type="button" value="5"/> | F |

EXAMPLE: HEXADECIMAL Format with the GEM-RP1CAe2: Program *Chime Timeout* to be 2 seconds.

DETERMINE THE DATA ENTRIES

1. Referring to SYSTEM DELAYS & TIMEOUTS in the Programming Worksheets that follow, the Chime Timeout is located at address 1418. In the "Chime Timeout Options" table, the data entries needed to assign a timeout of 2 seconds are "blank" and "8".

| | | |
|---------------|--------------|--|
| CHIME TIMEOUT | ADDRESS 1418 | |
| (1/4sec.) | | |

[Default = 2 1/4sec. = 1/2 sec.]

| CHIME TIMEOUT OPTIONS | | |
|-----------------------|-----------|-------------------------|
| DATA ENTRIES | | TIMEOUT |
| LEFT | RIGHT | |
| blank (*) | blank (*) | 0 x 1/4sec. = 0 sec. |
| blank (*) | 2 | 2 x 1/4sec. = 1/2 sec. |
| blank (*) | 3 | 3 x 1/4sec. = 3/4 sec. |
| blank (*) | 4 | 4 x 1/4sec. = 1 sec. |
| blank (*) | 5 | 5 x 1/4sec. = 1.25 sec. |
| blank (*) | 6 | 6 x 1/4sec. = 1.5 sec. |
| blank (*) | 7 | 7 x 1/4sec. = 1.75 sec. |
| blank (*) | 8 | 8 x 1/4sec. = 2 sec. |
| | | |
| F | F | 255 x 1/4sec. = 63.25 |

← 2 seconds

PROGRAM THE DATA ENTRIES

1. Enter the panel's Dealer Security Code, then press **MENU**.
2. Answer NO to all questions until "ACTIVATE PROGRAM Y/N" is displayed; then press YES. **NOTE:** If you pass "ACTIVATE PROGRAM", scroll backward using **BYPASS**.
3. Press **RESET** to enter the Address Program Mode. Address "0000" will display.
4. Press **1** **4** **1** **8A** to access Address 1418. *The existing data will display and the cursor will advance to the data field.*
5. Since you wish the timeout to be for 2 seconds (and 8 multiplied by ¼ second equals 2 seconds), press **0** **8A**. The numbers 08 will appear on the keypad display indicating the number of seconds entered.
6. Press **SAVE** to save. Address 1418 is now programmed with a 2-second chime.
7. Press **MENU** and enter another 4-digit address to continue programming --or-- press **RESET** to exit and resume normal keypad operation.

PROGRAMMING CONVENTIONS USED IN THIS MANUAL

The Keypad Programming Worksheets in the back are provided as an address-programming reference to help the installer modify his custom default program or to make minor field alterations to an existing panel program. It is recommended that the panel be uploaded to NAPCO's PCD-Windows software following any keypad programming and that the PCD-Windows's error-check feature be utilized to reduce the possibility of programming omissions or conflicts.

Keep the Keypad Programming Worksheets on file for future reference.

General Programming Steps

1. Contact the central station to ascertain receiver format, data format, event codes, subscriber numbers and telephone number(s).
2. Select the desired features by circling the respective "address" boxes. Refer to the Programming Options and Worksheets for guidance in selecting the "data" to be entered into those boxes.
3. Program the data entered in the boxes on the worksheets into the respective addresses. The display will show the entry numerically, but if hexadecimal format will display "0" for the number 10, and letters "B", "C", "D", "E", and "F" for the numbers 11 through 15, respectively. To program a 10, press ***** **0**. To program 11 through 15, press ***** **1** through ***** **5**, respectively.

The displays will appear after a brief delay.

- Use **MENU** to toggle the cursor between the 4-digit address field and the data entry locations.
- Enter the address directly using the number buttons.
- The contents of the address will be read automatically. The cursor will advance to the data field. Enter the required data directly using the number buttons.
- IMPORTANT:** Press **SAVE** to save the contents of each address.

EXIT DIRECT ADDRESS PROGRAM MODE: When done, press **RESET** to exit and resume normal keypad operation.

SYSTEM DELAYS & TIMEOUTS (ADDRESS 0000-0002, 1413, 1417, 2050 & 2055)

| | | | | |
|-------------------------|---------------------|--|--|--|
| EXIT DELAY (sec.) | ADDRESS 0000 | | | |
| [Default = 060] | | | | |

| | | | | |
|----------------------------|---------------------|--|--|--|
| ENTRY DELAY 1 (sec.) | ADDRESS 0001 | | | |
| [Default = 030] | | | | |

| | | | | |
|----------------------------|---------------------|--|--|--|
| ENTRY DELAY 2 (sec.) | ADDRESS 0002 | | | |
| [Default = 030] | | | | |

| | | | | |
|---|---------------------|--|--|--|
| PGM2 Output Access Cntrl Timeout (sec.) | ADDRESS 1413 | | | |
| [Default = 0 sec. = blank (*)] | | | | |

| | | | | |
|--------------------------|---------------------|--|--|--|
| ABORT DELAY (sec.) | ADDRESS 1417 | | | |
| [Default = 030] | | | | |

 Select delay/timeout (0-255 sec.).

EXIT/ENTRY DELAYS: Apply only to zones programmed with the following options "Exit/Entry 1, Exit/Entry 2, Exit/Entry Follower". For UL Installations, the maximum exit delay is 60 seconds and the maximum entry delay is 45 seconds. **NOTE:** Sensor Watch Time Options are similar to above, except in hours.

 Press  to save.

| | | | | |
|--------------------------------|---------------------|--|--|--|
| Sensor Watch Time (Hrs.) | ADDRESS 2050 | | | |
| [Default = 024] | | | | |

| | | | | |
|-----------------------------------|---------------------|--|--|--|
| Report Cancel Window (min.) | ADDRESS 2055 | | | |
| [Default = 0 min. = blank (*)] | | | | |

WARNING: Timers have uncertainty of +/-1 sec, so a "time" of 1 second may actually timeout IMMEDIATELY.

SYSTEM DELAYS & TIMEOUTS (ADDRESS 1418-1419)

| | | | | |
|-----------------------------------|---------------------|--|--|--|
| CHIME TIME (¼sec.) | ADDRESS 1418 | | | |
| [Default = 008 x ¼ sec. = 2 sec.] | | | | |

| | | | | |
|-----------------------------------|---------------------|--|--|--|
| AC Fail Report Delay (min.) | ADDRESS 1419 | | | |
| [Default = 060] | | | | |

DEFAULTS: The defaults shown on this page and on the following pages are automatically set after exiting the Easy Menu Driven Mode.

-  1. Enter delay/timeout in corresponding address locations above.
Note: All entries for address 1418 are in quarter seconds (.25 seconds). Therefore, the default of 008 results in a 2 second timeout.

 2. Press  to save.

DIRECT ADDRESS PROGRAM MODE

SYSTEM OUTPUT TIMEOUTS (ADDRESS 1412 & 1414-1416)

| | | | |
|------------------------|---------------------|--|--|
| PGM2 Output | ADDRESS 1412 | | |
| Timeout (min.) | | | |

[Default = 0 min. = blank (*)]

| | | | |
|-------------------------|---------------------|--|--|
| Alarm Output | ADDRESS 1414 | | |
| Timeout (min.) | | | |

[Default = 015]

| | | | |
|-------------------------------|---------------------|--|--|
| Pulse Alarm Output | ADDRESS 1415 | | |
| Timeout (min.) | | | |

[Default = 015]

| | | | |
|------------------------|---------------------|--|--|
| PGM1 Output | ADDRESS 1416 | | |
| Timeout (min.) | | | |

[Default = 0 min. = blank (*)]

| DATA ENTRIES | DELAY/ TIMEOUT |
|--------------|----------------|
| blank (*) | 0 min. |
| 001 | 1 min. |
| 002 | 2 min. |
| 003 | 3 min. |
| 004 | 4 min. |
| 005 | 5 min. |
| 006 | 6 min. |
| 016 | 16 min. |
| ↓ | ↓ |
| 255 | 255 min. |

1. Select delay/timeout (0-255 min.) from the table shown.
2. Enter in corresponding address locations above.
3. Press to save.

OUTPUT TIMEOUTS: If a timeout of "0 min." is selected, then the output will remain active (ON) until the system is reset or disarmed. For UL Residential Installations, the minimum timeout is 4 minutes. Not UL listed for Commercial Installations.

DOWNLOAD/CALLBACK OPTIONS (ADDRESS 2059 & 0526-0545)

| | | | |
|--|---------------------|--|--|
| No. Rings Before Pickup | ADDRESS 2059 | | |
| Timeout (min.) | | | |

[Default = 015]

NUMBER OF RINGS BEFORE PICKUP: Enter the number of rings before automatic pickup by the control panel when downloading from a computer (see Glossary at the back for more information).

1. Enter digit only.
2. Valid entries are: 003-015. **NOTE:** Default is 15 Rings.
3. Press to save.

| Callback Telephone Number (Digits 1-20) | ADDRESS 0526-0545 (RIGHT DIGITS 1-20) | | | | | | | | | | | | | | | | | | | | |
|---|---------------------------------------|------|------|------|------|------|------|------|------|------|------|------|------|------|------|------|------|------|------|------|--|
| (Digits 1-20) | 0526 | 0527 | 0528 | 0529 | 0530 | 0531 | 0532 | 0533 | 0534 | 0535 | 0536 | 0537 | 0538 | 0539 | 0540 | 0541 | 0542 | 0543 | 0544 | 0545 | |
| | | | | | | | | | | | | | | | | | | | | | |

[Default = blank (*) for all digits 1-20]

CALLBACK TELEPHONE NUMBER: Enter telephone number to be used when downloading from a computer (see Glossary at the back for more information).

1. Enter digit only (right nibble).
2. Enter up to 20 digits from left to right. **NOTE:** Leave trailing boxes blank (*).
3. Valid entries are: 1-9, B = , C = , D = 3 sec. pause, E = Wait for dial tone, F = ignore location.
4. Press to save.

PAGER FORMAT OPTIONS (ADDRESS 0546 & 0547)

| | |
|--|---------------------|
| Leading Digits for Pager Format (1st Digit) | ADDRESS 0546 |
| (1st Digit) | |
| Leading Digits for Pager Format (2nd Digit) | ADDRESS 0547 |
| (2nd Digit) | |

[Default = blank (*) blank (*)]

LEADING DIGITS FOR PAGER FORMAT: In Pager Format reporting, the message typically begins with "00". However, for some pager services, this will cause the Pager's Voice Mail feature to activate. This option allows you to program these digits to any number desired. A typical Pager report is "003 22 1234", where 3 is the Event, 22 is the zone, and 1234 is the Subscriber ID number. For example, if the Leading Digits are programmed as "98", the Pager report will now appear as "983 22 1234". **NOTE:** See CS Receiver Options to select Pager Format.

1. Enter in 1st and 2nd Leading Digits as shown (right nibble).
2. Valid entries are: 0-9. Press to save.

SYSTEM OPTIONS (ADDRESS 0836-0871 & 2045)

| SYSTEM RESPONSE ACTIVATED BY GLOBAL EVENT/TROUBLE | ADDR | GLOBAL SYSTEM EVENT/TROUBLE | | | | | | | |

[Default = blank (*) blank (*) from address 0864-0871] * **NOTE:** Keypad Aux. is not to be selected for UL Installations.

-  1. Select the desired option entering the option number (1-8) for each digit.
-  2. Enter corresponding option number in address location.

 **NOTE:** Dark shaded data value box shows option not available. Press  to save.

| Global Ambush Code | ADDRESS 2045 | |
|--------------------|--------------|-----------|
| | 1st digit | 2nd digit |
| | | |

[Default = blank (*) blank (*)]

GLOBAL AMBUSH CODE: It is the 2-digits entered immediately prior to the regular disarm code. If "Enable Global Ambush Code" (Address 1422) is selected and Address 2045 is left blank (*), then the 2-digit Global Ambush Code is "99". If "Enable Global Ambush Code" is selected and Address 2045 is **not** left blank (*), then the 2-digit Global Ambush Code is the two digits entered in address 2045.

 Enter in address location (both 1st and 2nd digits); valid entries are 1-9.

 Press  to save.

| Keyfob Low Battery | 0705 | |

CS SYSTEM REPORTING CODES:

1. Enter in corresponding address location (left and right digits).
NOTE: Left digit is the first digit and right digit is the second digit in a two digit CS receiver format.
2. Valid entries are: 1-9, 0 and B-F.
NOTE: A is not permitted.
3. To disable a code leave boxes blank (*).
NOTE: Dark shaded data value box shows option not available.
4. Press to save.

* **NOTE:** Keypad Aux. is not to be selected for UL Installations.

[Default = blank (*) blank (*) from address 0670-0682]
[Default = blank (*) blank (*) from address 0683-0705]

[Default = blank (*) blank (*)]

[Default = blank (*) blank (*)]

OPENING REPORT OPTIONS:

1. Select the desired option by circling the data values for each digit (left and right).
2. Add the data values (ex: F=15=(1+2+4+8) from the selected options. See page 13).
3. Enter in address location (left and right digits).

NOTE: Dark shaded data value box shows option not available. Press to save.

| 0788 | CS System Report Options | |
|---------|--------------------------|---|
| Default | Option | |
| OFF | 1 | Backup Report on Telco 1 & 2 |
| OFF | 2 | Touch-tone Dialing Only * |
| OFF | 3 | Touch-tone Dialing w/Rotary Backup * |
| OFF | 4 | RESERVED |
| OFF | 5 | Cancel Next Test Timer on any Report |
| OFF | 6 | Disable Wait for Silence (Pager Format) |
| OFF | 7 | Disable Wait for Handshake on Transmit |
| OFF | 8 | Disable Auto Dial Tone Detect |

CS SYSTEM REPORTING OPTIONS:

1. Select the desired option entering the option number (1-8) for each digit.
2. Enter corresponding option number in address location.
NOTE: Dark shaded data value box shows option not available.
3. Press to save.

* **NOTE:** If neither Touch-tone Dialing nor Touch-tone w/Rotary Backup is selected, then system defaults automatically to Rotary Dialing. Leave blank (*) to select Rotary Dialing.

| | | | |

Default for Group Zone Report Codes depends on Easy Menu Question "RCVR. FORMAT".

| ZONE REPORT CODE OPTIONS |
|--------------------------|
| DATA ENTRIES |
| |

NOTE: If "Zone Doubling" (Address 1423) is **not** enabled, then Zones 1-8 are included in the control panel and Zones 9-64 are EZM Zones. If "Zone Doubling" is enabled, then Zones 1-16 are included in the control panel and Zones 17-64 are EZM Zones. See Address 1455-1468 to enable "EZM Group Options".

| DATA ENTRIES LEFT | MODEM CODE |
|-------------------|-------------------|
| 1 | Fire |
| 2 | Panic |
| 3 | Burglary |
| 4 | Hold up |
| 7 | Gas Alarm |
| 8 | Heat Alarm |
| 0 | Auxiliary Alarm |
| B | 24 Hour Auxiliary |

PULSE EVENT CODE will be the first digit of the 2 digit reporting code. The second digit will be the second digit of the reporting zone. For example, for zone 9 (address 0728), if the right digit is "3", then the reporting code is "39". For example, for zone 15 (address 0734), if the right digit is "4", then the reporting code is "45".

MODEM CODES determine the zone types reported for the following formats: SIA and ADEMCO Point ID.

 1. Select the desired Modem Code for each zone from the table shown.

 2. Press  to save.

User 65 = Auto Arming/Disarming
 User 66 = Quickloader Remote Arming/Disarming
 User 67 = Easy Arming (Opening not applicable)
 User 68 = Keypad Arming
NOTE: These opening events will report as the user number shown. Also, Keyfobs 1-8 (see Easy Menu Program Driven Mode) will report as Users 57-64, respectively.

CS USER REPORTING OPTIONS: [Default = blank (*) from address 0800-0835]

1. Select the desired option entering the option number (1-8) for each digit.
2. At the keypad, enter corresponding option number in address location. **NOTE:** Dark shaded data value box shows option not available.
3. Press to save.

DIRECT ADDRESS PROGRAM MODE

EZM GROUP OPTIONS (ADDRESS 1455-1468)

| | | | | | |
|-------------------------------------|-------------------------------------|------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|
| EZM Group 1 ADDRESS 1455 | EZM Group 2 ADDRESS 1456 | EZM Group 3 ADDRESS 1457 | EZM Group 4 ADDRESS 1458 | EZM Group 5 ADDRESS 1459 | EZM Group 6 ADDRESS 1460 |
| [Dark Shaded Box] | [Dark Shaded Box] | [Dark Shaded Box] | [Dark Shaded Box] | [Dark Shaded Box] | [Dark Shaded Box] |
| EZM Group 7 ADDRESS 1461 | EZM Group 8 ADDRESS 1462 | EZM Group 9 ADDRESS 1463 | EZM Group 10 ADDRESS 1464 | EZM Group 11 ADDRESS 1465 | EZM Group 12 ADDRESS 1466 |
| [Dark Shaded Box] | [Dark Shaded Box] | [Dark Shaded Box] | [Dark Shaded Box] | [Dark Shaded Box] | [Dark Shaded Box] |
| EZM Group 13 ADDRESS 1467 | EZM Group 14 ADDRESS 1468 | | | | |
| [Dark Shaded Box] | [Dark Shaded Box] | | | | |

Default depends on Easy Menu Question “# OF ZNS IN AREA 1 ENTER # ZONES” and “EZ ZONE DOUBLING? Y/N”. For example, if 64 Zones are used and Zone Doubling is **not** enabled, then all 14 Groups will be automatically enabled. If 64 Zones are used and Zone Doubling is enabled, then only Groups 1-12 will be automatically enabled.

NOTE: If “Zone Doubling” (Address 1423, option 1) is **not** enabled, then Zones 1-8 are included in the control panel and Zones 9-64 (Groups 1-14) are EZM Zones. If “Zone Doubling” is enabled, then Zones 1-16 are included in the control panel and Zones 17-64 (Groups 1-12) are EZM Zones (and Groups 13 and 14 must not be used).

| EZM TYPE | | EZM ZONES COVERED | |
|--------------|------------------------------|-------------------|---------|
| DATA ENTRIES | OPTION | GROUP | DOUBLED |
| blank (*) | Not used (No EZM present) | 1 | 9-12 |
| 1 | 4-Zone EZM | 2 | 13-16 |
| | | 3 | 17-20 |
| | | 4 | 21-24 |
| | | 5 | 25-28 |
| | | 6 | 29-32 |
| | | 7 | 33-36 |
| | | 8 | 37-40 |
| | | 9 | 41-44 |
| | | 10 | 45-48 |
| | | 11 | 49-52 |
| | | 12 | 53-56 |
| | | 13 | 57-60 |
| | | 14 | 61-64 |

EZM GROUP OPTIONS: Up to 14 Groups of 4 Zones each may be programmed depending on the number of Zones used and which EZM modules are connected. Each Group represents 4 Zones.

1. Select EZM type from the table shown.
2. Enter either blank (*) or "1" in corresponding address locations above.

NOTE: Dark shaded data value box shows option not available.

3. Press  to save.

| OFF | 3 | Area 3 PGM2 Burg Output Silenced |
| OFF | 4 | Area 4 PGM2 Burg Output Silenced |

OUTPUT TURNS OFF UPON DISARM:

Select options for any of the 4 Outputs. By default, the ability to turn off an output upon disarm is not allowed. For example, the ability to silence an Area 1 through Area 4 output via an Area 1 keypad is not enabled by default. To enable selected area output control, enter the number (1,2,3,4) accordingly. For example, if you wish to grant an Area 1 keypad the ability to turn off an Area 2 PGM2 output, enter "2" in Address 1485.

Enter digit in address location. **NOTE:** Dark shaded data value box shows option not available. Press to save.

KEYPAD OPTIONS (ADDRESS 1425-1431, 1440-1446)

| Enable Keypad Type & Activation | ADDR | Enable Keypad Type | Keypad Area Assignment |

DIRECT ADDRESS PROGRAM MODE

Temperature Display at Keypad

The temperature is displayed instead of the date on line 2 of the GEM-RP1CAe2 (or GEM-K1CA) keypad. The keypad will display from -22F to 140F (or -30C to 60C). Fahrenheit is the default setting, select Celsius by enabling address 1668 option 2. When this Temperature Display Option is enabled, Zone 6 becomes the input for the GEM-TEMP64 Temperature Sensor module and Zone 6 of the panel becomes inoperative; if Zone Doubling is selected, zones 6, 14 will be inoperative.

Address 1668 option 3 enables Zone 6 to report a temperature problem. Address 1666 (options 1-7) set the lower limit temperature value and address 1667 (options 1-7) sets the upper limit temperature value (both values are set in binary). If the temperature detected by the panel is above or below these set limits, the panel will report an alarm on Zone 6. To function and report properly, Zone 6 must be selected as a reporting zone, 24hr zone in area 1 and auto-resettable. At both 1666 and 1667 addresses, option 8 sets positive or negative temperature. If the temperature of 0 degrees is required, "negative zero" (-0) degrees must be used (+0 or an empty location is not a valid temperature). To simulate the sensor module, a power supply can be connected to Zone 6 and set from .55v to 3.05v to display the whole temperature range. Temperature values are read and updated every 5 seconds. To report an outer limit temperature, the temperature must be out of limits for 2 seconds. To avoid false alarm reports, the limits have a threshold of 5 degrees in the software. Two new logs have been created for temperature out of limits and restore. If the  key is depressed and held down for 2 seconds, the date will display for 5 seconds.

In addition, three addresses must be enabled (either via Quickloader or via direct address programming) in order for the **Temperature Display at Keypad** feature to operate.

The following features must be enabled In Quickloader (or in direct address programming):

1. **Keypad Assignment, Temperature Settings** tab, **Enable Temperature Display** (Address 1668, option 1)
2. **Keypad Assignment, Keypad Features** tab, **Enable Keypad Time/Date Display** (Address 1420, option 7)
3. **Keypad Assignment, Keypad Features** tab, **Enable Set Time/Date Message** (Address 2051, option 1)

Note: If these three addresses are set and power (AC and battery) are subsequently removed, they keypad will indicate that the time and date are lost and will need to be reset. See W11425 for more information.

*This feature not evaluated by UL.

TO PROGRAM,
SEE NEXT PAGE

[Default = blank (•) from address 1489-1648].

DIRECT ADDRESS PROGRAM MODE

To program, follow the 5 steps below.

DIRECT ADDRESS PROGRAM MODE

| RELAY EVENT OPTIONS | | | | |
|---------------------|------------------|------------------|------------------|------------------|
| RELAY # | AREA | TIMEOUT | EVENT ID | COND. |
| See Step 1 below | See Step 2 below | See Step 3 below | See Step 4 below | See Step 5 below |

STEP 1

RELAY # OPTIONS: The GEM-P1664 supports 16 external relays from Relay Module RM3008. Multiple events may be "mapped" to each relay, up to a maximum of 32 events.

Select the **relay number** from **Table 1** (next page); enter in corresponding address location.

STEP 2

AREA OPTIONS: Each relay event can be assigned to Area 1, 2, 3 and / or 4.

Select the **area** from **Table 2** (on next page); enter in corresponding address location.

STEP 3

TIMEOUTS: Each relay event can be assigned a timeout depending on Alarm Type option.

If Alarm Type is selected for timeout in minutes or seconds, enter the 3-digit **timeout duration** in corresponding address location. To choose seconds or minutes, see step 5A below. 254 is maximum entry.

STEP 4

EVENT ID CODES: Each relay event can be assigned any of the available event IDs from **Table 4**.

Select 2-digit **Event ID** from **Table 4** (on next page); enter in corresponding address locations (left and right digit).

STEP 5

RELAY EVENT CONDITION OPTIONS: Each relay event can be assigned an alarm type; and an activation condition; also, select a timeout type for each. Enter 5A in left area, enter 5B in right area.

5A. Select **Alarm Type** and **Timeout Type** from **Table 5A** (on next page); enter in corresponding left address location.

5B. Select **Activation Conditions** from **Table 5B** (on next page); enter in corresponding right address location.

| RELAY EVENT OPTIONS | | | | |
|---------------------|----------------------------------|--|-------------------|--------------------------|
| RELAY # | AREA | TIMEOUT | EVENT ID | COND. |
| See Table 1 below | See Table 2 below (right nibble) | Enter a Time period, in seconds or minutes | See Table 4 below | See Tables 5A & 5B below |

 NOTE: Keypad Tamper must be enabled in UL installations.

DIRECT ADDRESS PROGRAM MODE

RF RECEIVER & SUPERVISORY TIMER OPTIONS (ADDRESS 2029-2044 & 2056)

| Number of RF Receivers | ADDRESS 2056 | |
|------------------------|--------------|-------------|
| | LEFT DIGIT | RIGHT DIGIT |
| | blank (*) | |

| DATA ENTRIES | RF RECEIVER(S) |
|--------------|----------------|
| blank (*) | None |
| 1 | 1 |
| 2 | 2 |

Default for Number of Receivers depends on Easy Menu Question for RF Transmitters.

RF RECEIVERS: Up to 2 RF Receivers may be programmed.

1. Select the number of receivers from the table shown.
2. Enter number in address location shown.
3. Press  to save.

RF SUPERVISORY TIMERS: RF Supervisory Timers may be programmed for each type of transmitter used. A transmitter will send a transmission every time it is tripped, when there is NO activity, the transmitter sends a status transmission about once an hour. If the receiver does NOT receive ANY signal (a trip or a status) from a transmitter in the time specified for transmitter type, a system trouble "WIRELESS TROUBLE/EO4-NN SERVICE" will be displayed at the keypad.

1. Select timer delay from the table shown. Timers are programmed in increments of 30 minutes each. Valid entries are [3] through [F] (90 minutes-450 minutes).
2. Enter in corresponding address locations below (right nibble).
3. Press  to save.

| RF SUPERVISORY TIMER | RF TRANSMITTER | ADDR | RF SUPERVISORY DELAY TIME (Select timer delay from the table at right) |
|----------------------|--------------------|------|--|
| Type 0 | Window/Door, 2 Pt. | 2029 | |
| Type 1 | Window/Door, 2 Pt. | 2030 | |
| Type 2 | Window/Door, 2 Pt. | 2031 | |
| Type 3 | Window/Door, 2 Pt. | 2032 | |
| Type 4 | RESERVED | | |
| Type 5 | PIR | 2034 | |
| Type 6 | PIR | 2035 | |
| Type 7 | Smoke Detector | 2036 | |
| Type 8 | Smoke Detector | 2037 | |
| Type 9 | RESERVED | | |
| Type A | Dual Tech. | 2039 | |
| Type B | RESERVED | | |
| Type C | Window/Door, 4 Pt. | 2041 | |
| Type D | PIR | 2042 | |
| Type E | Smoke Detector | 2043 | |
| Type F | Napco Glass Break | 2044 | |

| RF SUPERVISORY TIMERS | |
|-----------------------|----------|
| DATA ENTRIES | DELAY |
| 3 | 90 min. |
| 4 | 120 min. |
| 5 | 150 min. |
| 6 | 180 min. |
| 7 | 210 min. |
| 8 | 240 min. |
| 9 | 270 min. |
| 0 | 300 min. |
| B | 330 min. |
| C | 360 min. |
| D | 390 min. |
| E | 420 min. |
| F | 450 min. |

[Default = blank (*) from address 2029-2044]. Default = 8 (240 minutes)

NOTE: These timers apply only to Supervised RF Transmitters (see RF Transmitters in Easy Menu Driven Mode Programming).

DIRECT ADDRESS PROGRAM MODE

CLEAR PROGRAM OPTIONS (ADDRESS 2285 & 2286)

2285 XX H

Clear Dealer Program (Erases Dealer Program)

This erases the dealer program. Use this feature to start a customized default program. Program Data and System Status Memory is erased where Scheduled Data and Zone Descriptions are maintained.

Access address 2285, then press . Data entry is not allowed.

NOTE: Enter Easy Menu Driven Program Mode to program system again.

2286 XX H

Cold Start (Erases Entire Program)

This erases the entire program including Dealer Program by erasing Program Data, Zone Description Data and System Status Data (similar to a new panel).

Access address 2286, then press . Data entry is not allowed.

NOTE: Some features (schedules) can only be programmed again with the Downloading Software. If power fails, time and date restarts at 00:00:00 and a date of 01-01-04 (January 1, 2004).

USER PROGRAM MODE

PRELIMINARY INFORMATION

The User Program Mode is covered in detail in the operating instructions for the keypad in use.

-  The Program Mode cannot be accessed while the communicator is transmitting except during the first three minutes after power-up.
-  After entering codes or data, press the save  button. *Data will not be stored into memory unless this button is pressed.*
-  If the keypad is in the Program Mode and no activity is detected for longer than 4 minutes, a steady tone will sound.
-  Press the  button to silence the sounder and exit the User Program Mode.

NOTE: For ease of programming, it is recommended that a GEM K1CA (or GEM-RP1CAe2) be used. See Keypad Configuration Mode.

If a GEM-RP2ASe2/GEM-K2AS keypad is used, see WI1423.

ACCESSING USER PROGRAM MODE

1. Press **MENU**
 ← New Panel (Default User Code = 123) →
 Existing Panel (Any Code with User Program Option Enabled)

2. Press **Until "ACTIVATE PROGRAM Y/N" appears on LCD screen.**

3. Press **To Enter User Program Mode**

4. Press **To Exit User Program Mode when finished**

DIRECT ADDRESS PROGRAM MODE

USER CODES

GEM-K1CAe2 Keypad (Direct Entry)

Up to 64 User Codes may be programmed.
NOTE: In this mode, only the code is programmable; the accompanying Area Options must be programmed in the Dealer Program Mode (see page 5).

Use the button to place the cursor over the User Number.

Enter a User Number (01-8) using the number buttons. The cursor will then advance to the User Code and read the existing code, if any.

Enter the new User Code using the number buttons (0-9). If an old code is displayed, program over it. To erase the digit at the cursor, press .

Press the button to save the code in memory.

Repeat this procedure for each user. To proceed to Zone-Description programming, press the NEXT/YES button or the PRIOR/NO button.

To Program User Codes

1. Set Cursor Position using the button.
2. Enter 2-digit User Number (01-64) directly using number buttons (0-9).
3. Enter Code (1-6 digits) directly using number buttons (0-9).
4. Press the button to save each code.

NOTE: Press button to clear character at cursor.
 To continue press or button.

Programming User Codes with GEM-K1CA Keypad

ZONE DESCRIPTIONS (GEM-RP1CAE2 / GEM-K1CA KEYPADS)

01-

Enter an identifying description for each zone. Characters are selected by pressing keypad buttons multiple times, "Cell Phone" style. Buttons  through  plus  and  are used, as per the following table:

| PRESS: | CHARACTERS DISPLAYED IN SEQUENCE | HOLD  AND PRESS: | CHARACTERS DISPLAYED IN SEQUENCE |
|---|----------------------------------|---|----------------------------------|
|  | ABC1 |  | abc1 |
|  | DEF2 |  | def2 |
|  | GHI3 |  | ghi3 |
|  | JKL4 |  | jkl4 |
|  | MNO5 |  | mno5 |
|  | PQR6 |  | pqr6 |
|  | STU7 |  | stu7 |
|  | VWX8 |  | vwx8 |
|  | YZ90 |  | yz90 |
|  | (SPACE)•- . () , / : ? # |  | (Reserved) |

Press  to move cursor right.

Press  to move cursor left.

Notes:

1. After releasing the number button for 2 seconds, the character will be accepted and the cursor advanced to the right.
2. After releasing the number button, if a new number button is pressed before the 2 second window expires, the current character will be accepted and the cursor automatically advanced to the right. The first of the 4 characters of this new number button will be displayed.
3. To erase an existing entry, use  or  to move the cursor below the character to be changed. Enter a new character to overwrite the old, or press zero to delete the character.
4. To generate lowercase characters, the  button must be pressed and held down while pressing the number button. If the  button is released during the 2 second window, the current character will change to uppercase.

Press  to save.

To advance to the next zone (or to any other zone), move the cursor to the displayed zone number (i.e., "01") using  and . Change the zone number using keys  through . Enter two digits for the zone number (after entering the first digit, the cursor will automatically advance to the second digit). When the second zone number digit is entered, the cursor will automatically advance to the right, allowing the description locations to be entered.

Always press  to save each zone description.

Enter Date
 < / / >

(Direct Entry)

Enter Date (Press the  button to set cursor.)

Enter the current date in the format MM/DD/YY, where MM = the month (01–12); DD=the day (01–31); and YY=the year. Press  to save. Press NEXT button to proceed.

Enter Time
 < : >

(Direct Entry)

Enter Time (Press the  button to set cursor.)

Enter the current time in the format HH:MMA/P, where HH=hours (01–12); MM=minutes (00–59). Select AM or PM by pressing any number button, then press  once again to save.

NOTE: To enter the date and time, GEM-RP1CAe2/GEM-K1CA keypad (version 9A or greater) must be used and "Enable Keypad Time/Date Display" (Address 1420) must be enabled.

KEYPAD CONFIGURATION MODE

This section will focus on configuring the GEM-RP1CAe2/GEM-K1CA Keypads. If there is more than one keypad in the system, we recommend that either a GEM-RP1CAe2 or a GEM-K1CA keypad be used for programming.

KEYPAD INSTALLATION

Several types of keypads may be used with the GEM-P1664: the GEM-RP1CAe2/GEM-K1CA, the GEM-RP2ASe2/GEM-K2AS, the GEM-RP3DGTL/GEM-K3DGTL, and the GEM-RP4RFC/GEM-K4RF series (see WI1423). Each must be assigned an address number (1–7) and each requires its own configuration procedure (see CONFIGURING THE KEYPADS, which follows, and DIRECT ADDRESS KEYPAD AREA OPTIONS). At least 1 keypad must be used; only 1 is required for a single-area Commercial Burglary installation.

GEM-RP1CAe2/GEM-K1CA - is a 2-line combination fire/burglary/access keypad capable of supporting 4 EZM zones and a PGM output. The GEM-RP1CAe2 or GEM-K1CA is recommended for programming. See "Important Note" on page 2 for more information regarding the buttons on the GEM-RP1CAe2/GEM-K1CA keypads.

CONFIGURING THE KEYPADS

A total of up to 7 keypads may be connected to the panel. GEM-RP1CAe2/GEM-K1CA, GEM-RP2ASe2/GEM-K2AS, GEM-RP3DGTL/GEM-K3DGTL, and GEM-RP4RFC/GEM-K4RF series keypads may be intermixed but require different configuration procedures, as described below and in WI1423.

Configuring the GEM-RP1CAe2/GEM-K1CA Keypad

Each GEM-RP1CAe2/GEM-K1CA keypad must be configured for (a) keypad tactile beep; (b) entry sounder; (c) keypad address; (d) compatibility number; (e) EZM address; and (f) zone response.

To enter the Keypad Configuration Mode:

1. Move jumper JP1 (located in the center of the control panel board) from Pins 1-2 (top two) to Pins 2-3 (bottom two). **NOTE:** See Wiring Diagram at the end of this manual.
2. After about 15 seconds, the display will read "XX OUT OF SYSTEM", where XX indicates the keypad address.
3. Press and proceed as follows. (Repeat the following procedure for all keypads).

NORMAL

KEYPAD
CONFIGURE

Keypad Beep

ON

Keypad Tactile Beep

Upon entering the Keypad Configuration Mode, "KEYPAD BEEP ON" will be displayed, indicating that the tactile beep, which sounds when any button is pressed, is on. To turn off the tactile beep, press the button (the button will toggle the tactile beep on and off). Press to continue or press to exit.

Entry Sounder

ON

Entry Sounder

To turn off the keypad entry sounder during entry time, press (the button will toggle the entry sounder on and off). Press to continue or press to exit.

Keypad Address

01

Keypad Address

If more than one keypad is installed, each must be assigned a unique keypad address (that is, no two keypads may be numbered alike):

Keypads must be numbered consecutively (missing numbers are not permitted)

To assign the keypad number, proceed as follows:

1. Enter the assigned keypad number 01–07, then press to save. A valid number will be acknowledged by a short beep; an invalid number will be rejected by a long beep.
2. Press to continue or press to exit.

| |
|------------------------------|
| <p>New Compat # 0000</p> |
|------------------------------|

Compatibility Number (Not Applicable)

THIS FEATURE IS NOT COMPATIBLE WITH THE GEM-P1664 CONTROL PANEL. **DO NOT CHANGE THIS SETTING.**

Press the  button to continue or press the  button to exit.

| |
|---------------------------|
| <p>EZM Address 01</p> |
|---------------------------|

EZM Address

The keypad's internal EZM (Expansion Zone Module) may be utilized to provide four additional wired zones. Whether used alone or in conjunction with optional GEM-EZM series modules or other keypad EZMs, it must be assigned a unique address (or Group number, see Keypad Programming Workbook) similar to its keypad address. If no other EZMs are to be used,

designate the keypad as Group "01" at the "EZM ADDRESS 00" display. In multiple-EZM systems, enter an assigned group number "01" through "14". (Each EZM must have a unique assigned group number, starting with "01" and proceeding consecutively.) Press the  button to continue or press the  button to exit.

| |
|-----------------------------|
| <p>Zone Response 00</p> |
|-----------------------------|

Zone Response

The normal loop response of each keypad expansion zone is 750mS, however the response time of any zone can be reduced to 50mS as follows.

1. Of the following, circle the number(s) in parentheses associated with the zone(s) to be changed: Zone 1=(1); Zone 2=(2); Zone 3=(4); Zone 4=(8)
2. Add up the circled numbers.

3. At the keypad, enter the sum as a two-digit number "01" through "15" on the display, then press .

Example. Change Zones 2, 3 and 4 to 50mS response.

1. Circle numbers for Zones 2, 3 and 4: (2), (4) and (8).
2. Add up the circled numbers: 2 + 4 + 8 = 14.
3. Enter "14" at the keypad, then press the  button.

Press the  button to continue or press the  button to exit.

Program Control Message (Not Applicable)

THIS FEATURE IS NOT COMPATIBLE WITH THE GEM-P1664 CONTROL PANEL.

Press the  button to continue (the display will loop back through selections, for changes) or press the  button to exit the Keypad Configuration Mode (display will read "01 OUT OF SYSTEM"). Then replace Jumper JP1 across Pins 1–2 (top two).

| 20VA* | 7AH | 120mA | 360mA(1) | 24 HOURS |
| 20VA* | 2-7AH | 360mA | 120mA(1) | 24 HOURS |

(1) ALARM CURRENT CAN BE INCREASED BY REDUCING STANDBY CURRENT BY THE SAME AMOUNT.

* NOT PRESENTLY EVALUATED BY U.L.
** COMMERCIAL BURGLARY IS NOT PRESENTLY EVALUATED BY U.L.

PCD LOCAL DOWNLOAD CONNECTION

WARNING

TO PREVENT RISK OF ELECTRIC SHOCK DISCONNECT TELEPHONE LINES PRIOR TO SERVICING.

STANDARD ZONE WIRING (12VDC 5mA)

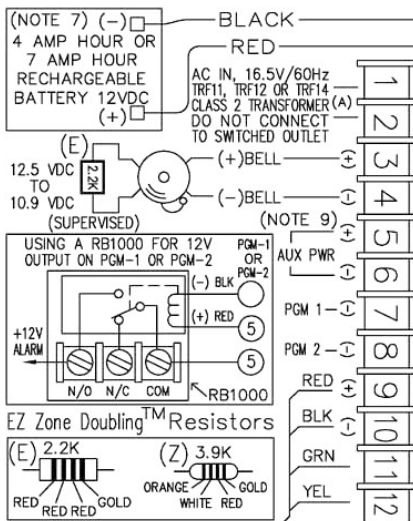

EZ Zone Doubling™ Wiring (ONLY FOR N.C. BURG. ZONES)

(NOTE 6) 2 WIRE SMOKE DETECTOR WIRING

4 WIRE SMOKE DETECTOR WIRING

THIS UNIT INCLUDES AN ALARM VERIFICATION FEATURE THAT WILL RESULT IN A DELAY OF THE SYSTEM ALARM SIGNAL FROM THE INDICATED CIRCUITS. THE TOTAL DELAY (CONTROL UNIT PLUS SMOKE DETECTORS) SHALL NOT EXCEED 60 SECONDS. NO OTHER SMOKE DETECTORS SHALL BE CONNECTED TO THESE CIRCUITS UNLESS APPROVED BY THE LOCAL AUTHORITY HAVING JURISDICTION.

| CIRCUIT ZONES | CONTROL UNIT DELAY-SEC | SMOKE DETECTORS MODEL-DELAY-SEC. |
|---------------|------------------------|----------------------------------|
| 12 | | (+) |

+ THE DELAY (POWER UP) (STARTUP) TIME MARKED ON THE INSTALLATION WIRING DIAGRAM OF THE SMOKE DETECTOR OR ON THE INSTALLED SMOKE DETECTOR(S) IS TO BE USED.

- NOTES:
- ALARM CURRENT CAN BE INCREASED BY REDUCING STANDBY CURRENT BY THE SAME AMOUNT.
 - THE FOLLOWING DEVICES MAY BE PLACED ON THE REMOTE BUS: GEM-RP1CAe2, GEM-RP2ASe2, GEM-EZM816, GEM-X10, GEM-RECv8, GEM-RECv16, RM3008, GEM-EVA1, WIZARD2, GEM-KICA, GEM-K2AS, GEM-K3DGL AND GEM-RECv96.
 - REFER TO W1388 FOR U.L. LISTINGS.
 - COMBINED STANDBY CURRENT = KEYPAD CURRENT + AUX CURRENT + FIRE POWER + PGM1 AND PGM2 CURRENT.
 - UNIT INTENDED TO BE MOUNTED VERTICAL ON WALL.
 - REFER TO W1388 FOR COMPATIBLE TWO WIRE SMOKE DETECTORS. DO NOT MIX DIFFERENT MODELS.
 - RECOMMENDED BATTERIES YUASA NP4-12 OR NP7-12. BATTERY SHOULD BE REPLACED EVERY 5 YEARS.
 - THIS PANEL SHALL BE CHECKED BY A QUALIFIED TECHNICIAN AT LEAST ONCE EVERY 3 YEARS.
 - AUX. POWER AND FIRE POWER VOLTAGE RATING: 12.5 VDC TO 11.7 VDC. THE PANEL WILL DISREGARD INPUTS FROM ALL SENSORS WHEN VOLTAGE DROPS BELOW 8.5V.
 - A.C. MUST BE DISCONNECTED WHEN PERFORMING WEEKLY TESTS.
 - THIS PANEL ONLY SUPPORTS ONE SMOKE DETECTOR IN ALARM FOR EACH ZONE.
 - DISABLE AUTO-RESET ON NON-FIRE ZONES FOR SIA CP-01 INSTALLATIONS.
 - DESIGN EVALUATED BY UL IN ACCORDANCE WITH SIA CP-01 CONTROL PANEL STANDARD FEATURES FOR FALSE ALARM REDUCTION.
